Information for parents of children of the ages of one to six

This brochure was produced by

**Skolverket**  
Swedish National Agency for Education

## Do you have a child of age one to six? In that case, your child can attend preschool.

Preschool education lays the groundwork for your child's continuing education in school and for the rest of his or her life.

Preschool teachers and other personnel work in preschool and provide your child with the opportunity to develop and learn in a safe environment.

In preschool, your child will develop his or her ability to communicate in Swedish. Children who have mother tongues other than Swedish will also have an opportunity to develop their ability to communicate in those languages.

**Give your child a good start.**

### In preschool, your child will:

- play and have fun with other children
- learn through play, exploration, and various creative activities
- develop in many different areas, such as basic number sense, nature exploration, and speech and language.
